Attendance & Overtime Record Export

LC-001 late-night work entries for the pre-non-renewal period

Nov 22 – Dec 10

Badge-scan and timesheet entries show the employee clocking out after 22:00 on nine separate evenings during this period. The overtime pattern coincides with a high-pressure product delivery sprint.

Jan 2 – Jan 15

Late-night sessions continued into early January. Three entries show departure times past midnight. No compensatory time-off or overtime approval forms appear in the HR system for these sessions.

Jan 18 – Non-Renewal Notice

The employer issued the non-renewal decision on January 18, less than two weeks after the last recorded overtime session and without referencing the conversion promise made in November.

Audit Note

The overtime pattern overlaps with the conversion-promise timeline and contradicts the employer's stated rationale for non-renewal. This export should be reconciled against the manager chat thread and the HR approval record.
