Additional Information

Render a clean one-page retailer gift receipt PDF. Header shows the merchant brand and title 'Gift Receipt'. Include order number 'EC-80463', recipient name 'Elise Tan', purchase date, and an itemized line for 'SafeHeat Baby Food Warmer BFW-220' with quantity 1. Make the document clearly different from a full invoice by omitting card details and billing information; include a line such as 'Gift receipt - original payment method intentionally masked'. Add standard gift-return language and barcode/footer styling. The text must be precise and machine-readable because agents need the order number, gift status, recipient identity, and exact item description to determine reimbursement eligibility.
