Knowledge Policy Recall And Gift Reimbursement Ec T13

Policy PDF containing the exact recall-handling rules and gift-receipt reimbursement guidance that determine the allowed refund destination.

Document Details

General

knowledge_article[KA-RECALL-204]: recall handling policy article identifier

knowledge_article[KA-GIFT-118]: gift receipt reimbursement guidance article identifier

policy_rule[recall_refund_destination]: recalled items are eligible for reimbursement after product/order validation

policy_rule[gift_receipt_credit_only]: for gift purchases where the claimant is the recipient and only a gift receipt is provided, reimbursement must be issued as store credit, not to the original payment method

policy_rule[duplicate_case_block]: do not issue reimbursement if the associated recall case already shows a completed payout or duplicate claim

policy_rule[verification_required]: customer identity verification is required before account-specific actions

Additional Information

Render a two-page internal knowledge-base PDF export with exact policy text. Page 1 should be article 'KA-RECALL-204 Product Recall Reimbursement Procedure' and explicitly require identity verification before account-specific action, product/order validation, and checking case history for prior payouts. It should state that approved recall claims may be reimbursed according to payment-destination rules in linked article KA-GIFT-118. Page 2 should be article 'KA-GIFT-118 Gift Receipt Reimbursement Guidance' and clearly state: if the item was purchased as a gift and the claimant is the gift recipient presenting only a gift receipt, refund to the original purchaser's payment method is not permitted; reimbursement must be issued as merchant store credit or gift card to the verified recipient. Also include a line that duplicate or previously resolved recall cases are ineligible for another payout. Format as a realistic internal policy export with article IDs, revision dates, section headings, and precise wording.
