Packing Slip Order Ec-44172

Packing slip included in the shipment, listing the delivered order contents and customer contact details used for cross-checking against the authoritative order.

Document Details

General

document_type: packing slip

order_id: EC-44172

customer_name: Leila Haddad

customer_email: leila.haddad@example.com

shipment_contents: blender item listed as fulfilled

adjacent_reference_risk: a footer references nearby warehouse batch including EC-44127, creating a possible decoy order number

delivery_status_context: marked packed and shipped, not a return authorization

merchant_policy_note: visible note instructs customers to contact support for transit damage within the allowed post-delivery window

Additional Information

Render a clean one-page ecommerce packing slip PDF for order EC-44172. Include header with merchant name, document title 'Packing Slip', order number EC-44172, ship-to customer Leila Haddad, and email leila.haddad@example.com. Include a line-item table showing a blender product as fulfilled/shipped. Add standard warehouse fields like pick ticket, carton count, and shipment date. In a footer or small warehouse note, include a nearby reference to batch sequencing mentioning EC-44127 so agents must distinguish the true order from an adjacent decoy. Include a short printed policy note that shipping damage must be reported to support within the merchant's post-delivery resolution window. Layout should resemble a genuine fulfillment document with precise text suitable for PDF inspection.
