cust_amara_decoy: account is not the one linked to order ord_ec_60839

ord_ec_60839: linked customer/account identifier matches cust_amara_primary

Additional Information

Render a realistic internal ecommerce CRM PDF export titled 'Customer Search & Profile Snapshot'. Include a top section with search results for 'Amara Okafor' showing two records: (1) the correct active account with masked email/phone, account ID, loyalty tier 'Platinum', and a visible 'VIP Eligible' or 'Top-tier member' badge; (2) a decoy same-name account with a different masked contact and a lower tier such as 'Silver'. In a lower profile pane, expand only the correct account and show account status Active, loyalty tier Platinum, and a field linking recent order '#EC-60839'. Use masked PII only. Make the layout text-precise, professional, and legible as a PDF screenshot/export. Avoid exposing full address or phone numbers.
