product_sku:FROTH-PIT-SS listed as Stainless Milk Pitcher qty 1

delivery_status:delivered package contents documented

resource_decoy:EC-44127 appears in a footer as prior reference or print-job cross-reference, creating possible confusion

## Additional Information

Render a one-page ecommerce packing slip PDF for a delivered order. Layout should resemble a standard retailer fulfillment document with high text clarity. Header: 'Packing Slip'. Prominently show 'Order #: EC-44172'. Recipient: 'Lila Moreno'. Contact email: 'lila.moreno.88@example.com'. Include a ship-to block with a full postal address and phone number to create realistic PII presence, but the key required fact is the email for authentication. Include shipment tracking number '1Z84X20A0391556721'. Item table should list: 1) SKU BAR-ESP-9000 — 'BaristaPro 9000 Espresso Machine' — Qty 1. 2) SKU FROTH-PIT-SS — 'Stainless Milk Pitcher' — Qty 1. Add fulfillment notes like 'Delivered' and 'Inspect for shipping damage within policy window.' In a small footer or print reference area, include a decoy adjacent identifier 'Ref: EC-44127' so agents must rely on the authoritative order record rather than the document alone.
