entity:decision/customer_notice delay decision to wait for processor root-cause report until 2025-02-14 morning

entity:vendor/northbeam_cloud identified as subprocessed hosting vendor handling support-portal backups

Additional Information

Create a realistic 7-page corporate incident bridge-call transcript PDF for Altrix Home Systems titled 'Incident Bridge Transcript - Support Portal Data Exposure'. Include page headers with date 2025-02-11 and confidentiality footer 'Privileged & Confidential'. Use transcript formatting with speaker names and timestamps in CET. Key content must include: (1) 05:58 CET message from Northbeam Cloud reporting suspicious backup bucket access; (2) 06:12 CET SOC analyst saying logs show unauthorized export queries; (3) 06:32 CET security lead saying 'This is our first confirmed awareness'; (4) discussion of affected populations: 1,842 EU residents and 611 California residents; (5) categories exposed: names, emails, postal addresses, device identifiers, and smart-home usage notes; (6) 09:05 CET token revocation/containment; (7) legal counsel states GDPR regulator notice should be measured from controller awareness and draft has not started; (8) operations director suggests waiting until 2025-02-14 morning for processor root-cause report before sending customer notices. Make the transcript dense and precise enough that agents must read it carefully for dates, obligations, and sequence.
