ent.feature.accused_rotational_lock_tab is alleged to satisfy a 'radially biased locking member' limitation

ent.feature.accused_torque_relief_channel is alleged to satisfy a 'torsion-dampening channel' limitation

Additional Information

Render a clean, realistic 4-page US law firm cease-and-desist letter PDF on letterhead from 'Hale Pritchard LLP' representing 'Medivault Surgical IP LLC' to 'Osprey Arc Medical Devices, Attn: General Counsel'. Date: April 12, 2025. Subject: Unauthorized Use of Technology Covered by U.S. Patent No. 11,098,765, titled 'Catheter Stabilization and Torque Relief Assembly.' Include precise legal prose alleging that Osprey's 'VascuSecure prototype Rev B' infringes claim 1 and dependent claims 4 and 7. State that publicly available marketing materials and a side-by-side product comparison show a rotational lock tab and torque-relief channel corresponding to claim limitations. Demand written confirmation by April 26, 2025 that Osprey will cease commercialization, preserve evidence, and discuss a non-exclusive license. Include a proposed royalty of 7% of net sales subject to a $250,000 annual minimum. Mention prior outreach on March 28, 2025 offering license discussions. Include a paragraph threatening pursuit of injunctive relief and damages for post-notice activity. The PDF should look authentic and text-searchable, with signature block for 'Marina Hale, Partner.'
