ent.company.archwell_biomedical is the publisher of the brochure

ent.date.prior_art_publication_2019_06_03 is visible on the brochure footer

Additional Information

Render a realistic 3-page medical device product brochure PDF from 'Archwell Biomedical' for a product called 'VascuGuard Torque Stabilizer.' Include a visible publication/footer date of June 3, 2019. The brochure should show diagrams and marketing text describing: a rotating lock collar with open/locked positions, a longitudinal torque-relief or flex channel along the hub, and a removable strain-relief clip. Do not include any green/red status window; instead use neutral markings. Make the brochure look genuinely older than the dispute materials and text-searchable, with product specs and feature bullets suitable for prior-art comparison.
