Source Repository Access Log Apr18 2025

Repository and identity-access log showing the engineer's final-day source access and transfer-related events.

Document Details

General

person.departed_engineer: Evan Mercer

system.repo: EVR-GaitCore monorepo

system.repo2: EVR-SensorFusion private repo

log.date: 2025-04-18

log.event.1: 2025-04-18 17:41:12 badge-out recorded at EmberVale HQ for Evan Mercer

log.event.2: 2025-04-18 17:44:03 VPN session initiated for user emercer from residential ISP in Oakland, CA

log.event.3: 2025-04-18 17:46:18 git archive/export of EVR-GaitCore refs/heads/main totaling 2.3 GB by emercer

log.event.4: 2025-04-18 17:49:55 bulk download of EVR-SensorFusion design package totaling 640 MB by emercer

log.event.5: 2025-04-18 17:52:10 USB-write-alert on managed laptop EV-LT-4471 for external storage volume label SANDISK_EXT

log.event.6: 2025-04-18 18:03:27 account added to legal-hold watchlist by security analyst

log.event.7: 2025-04-18 18:14:09 recruiter-domain email access from personal webmail forwarding rule detected

log.event.note: no written approval entry exists for personal-device sync or removable-media export

log.decoy.reference: appendix includes unrelated logs for another engineer Maya Rios on 2025-04-16 marked 'adjacent matter - not this custodian'

Additional Information

Render a 4-page internal PDF report titled 'Source Repository and Identity Access Report — Custodian: Evan Mercer'. Include a cover summary and detailed timestamp table for 04/18/2025. The key timeline must clearly show: 17:41:12 badge-out at EmberVale HQ; 17:44:03 VPN login from Oakland residential ISP; 17:46:18 git archive/export from EVR-GaitCore main totaling 2.3 GB; 17:49:55 bulk download from EVR-SensorFusion private repo totaling 640 MB; 17:52:10 endpoint alert showing USB write to external storage volume 'SANDISK_EXT' on laptop EV-LT-4471; 18:03:27 security analyst adds account to legal-hold watchlist; 18:14:09 forwarding rule / access via personal webmail tied to recruiter-domain communications. Add a note that no written approval for personal-device sync or removable-media export exists in access exceptions. Include an appendix page explicitly labeled 'Adjacent Matter — Maya Rios — 04/16/2025 — Not this custodian' to create realistic wrong-artifact risk but keep it visually segregated. Make timestamps precise and legible.
