Atlas Relocation Policy

Relocation policy document defining sequencing, chain-of-custody, after-hours windows, and executive-area restrictions for office moves.

Document Details

General

ENTITY:POLICY:ATLAS_RELOCATION states office moves involving end-user devices must occur only during approved after-hours window 18:30-22:30 local time.

ENTITY:POLICY:ATLAS_RELOCATION states policy sequence: policy approval and scope confirmation before change scheduling; change scheduling before physical move execution.

ENTITY:POLICY:ATLAS_RELOCATION requires chain-of-custody tags for laptops, monitors, and docking stations during relocation.

ENTITY:POLICY:ATLAS_RELOCATION states handwritten or legacy desk stickers are not authoritative for assignment; directory and asset records control scope.

ENTITY:POLICY:ATLAS_RELOCATION states executive offices/corridors require escort and no temporary staging without facilities approval.

ENTITY:POLICY:ATLAS_RELOCATION states rack or patch-panel changes require closet label verification before mover handoff.

ENTITY:POLICY:ATLAS_RELOCATION references knowledge override key 'redwood_move_kb' for current client-specific exceptions.

Additional Information

Create a text-rich corporate policy PDF titled 'Atlas Relocation Policy - Office Moves and Equipment Handling'. Format it like an internal SOP with numbered sections and a revision footer. Required sections: 1) Approved move windows: state that moves involving end-user devices must occur only during approved after-hours window 18:30-22:30 local time. 2) Required sequence: state that policy approval and scope confirmation must occur before change scheduling, and change scheduling must occur before physical move execution. 3) Chain-of-custody: require custody tags/signoff for laptops, monitors, and docking stations. 4) Assignment authority: explicitly say handwritten or legacy desk stickers are not authoritative; official directory and asset records govern scope. 5) Executive area handling: executive offices/corridors require escort and no temporary staging without facilities approval. 6) Network closet handling: rack or patch-panel changes require closet label verification before mover handoff. Include a final note: 'See knowledge override key redwood_move_kb for current client-specific exceptions.' Make the text precise and easily extractable.
