Additional Information

a realistic 3-page internal move-management context packet PDF

Page 1 present a concise request summary table with move timing, access constraints, budget guidance, and payment approval notes

Page 2 include two embedded-style evidence sections: one summarizing an uploaded storage quote screenshot and one summarizing an apartment loading-dock map image, each with captions and short analyst notes

Page 3 include a bulleted operational constraints section and a boxed 'critical restrictions' callout emphasizing access windows, weekday-only limitations, and planning dependencies

Make the packet look like an internal case-prep document with section dividers, tables, callout boxes, and realistic office typography
