Recall Operations Guidance RC 2025 0417

Internal recall-handling guidance specifying validation steps, permitted remedies, and when Recall Operations must own the case.

Details

Document Title	Recall Operations Guidance
Guidance Code	RC-2025-0417
Effective Date	2025-04-17
purpose states that the document defines validation steps, permitted remedies, and ownership rules for recalled products	
identity verification is required before any refund, replacement, return authorization, or other financial action	
order review requires confirming the delivered order record and matching the product details against the customer-provided serial label	
customer-provided recall evidence may include a recall email screenshot and a photo of the product serial label	
Recall Operations must own the case when the delivered item is confirmed to be part of an active safety recall	
permitted remedies include refund, replacement, or returnless disposal only when explicitly authorized by Recall Operations	
order id EC-10458 appears in a sample case reference	
customer id CUS-6187 appears in a sample case reference	
the guidance instructs agents to document verification outcome, order inspection findings, and recall determination in the case notes	

Additional Information

a realistic 3-page internal policy PDF in a corporate ecommerce operations style using reportlab

a clearly labeled table listing remedy types, approval requirements, and constraints

Page 3 include a section on case documentation requirements, a short example case reference block, and a decision matrix or callout box explaining when Recall Operations take ownership

the example reference block visually includes the provided customer and order IDs
