Additional Information

a realistic 2-page ecommerce email-receipt PDF exported from an email message

Prominently display the order identifier near the top and include a delivered status with a precise timestamp

The line-items area show one product row, quantity, unit price, discount/promotion row, subtotal, shipping, tax, and final total in a structured grid

subtle footer text such as customer support/contact info and a note that this is the email receipt for the delivered order

Page 2 contain standard receipt boilerplate: return information, refund timing note, merchant contact details, and a compact transaction summary repeated in smaller type

Use clean sans-serif typography, realistic spacing, table borders, muted gray dividers, and a professional retail invoice layout
