| **Prepared By Team** | Internal Claims Quality Review Unit |

## Additional Information

a realistic 3-page internal claim memo packet PDF using reportlab

Page 1 be a cover or routing page with internal-use labeling, packet reference, subject, status, and claimant identifiers

Page 3 include an adjacent-record verification or appendix section that intentionally references another nearby record for compliance-checking purposes, visually separated from the main claim content with clear labels like 'adjacent record reference' or 'do not cite

The layout make the correct claimant record clear while still including the decoy reference in a plausible internal-review context
