Hc-041 Urgent Care First Trimester Note

Urgent-care encounter note documenting current pregnancy status, symptoms, prior instructions, and a proposed medication plan that must be reconciled.

Details

Case ID HC-041 appears on the note header.	
Client ID PT-HC-041 appears on the note header for Soraya Bhatt.	
Request ID RXR-59288 is referenced as the medication review follow-up request.	
The note states the patient is in the first trimester with positive home pregnancy test and known intrauterine pregnancy under outside OB follow-up.	
The HPI documents 3 days of cough, nasal congestion, sore throat, subjective fever, and reduced oral intake with nausea.	
The note documents concern for dehydration due to poor intake and lightheadedness.	
The assessment lists presumed viral upper respiratory infection and advises avoidance of NSAIDs in pregnancy.	
The plan recommends an over-the-counter cold/flu combination product from the attached box photo, creating a medication-safety reconciliation need.	
The note also mentions acetaminophen as a fever/pain option and encourages hydration.	
The medication list in the note includes prenatal vitamin and pyridoxine/doxylamine use for nausea earlier in pregnancy.	
The social context documents that the patient works in a daycare with multiple sick contacts at home/work.	
The note includes a disclaimer that pregnancy-safe medication selection should be confirmed with obstetric care.	

Additional Information

a realistic 2-page outpatient urgent-care PDF clinical note

Use a standard medical note layout with header, patient identifiers, HPI, ROS, meds, assessment, and plan

these exact identifiers in the header: Case ID HC-041, Client ID PT-HC-041, Request ID RXR-59288, patient name Soraya Bhatt

social history noting daycare employment and sick contacts

Current medications list prenatal vitamin and pyridoxine/doxylamine

In the plan, explicitly reference that the patient brought or photographed an OTC cold/flu combination box for review and that pregnancy-safe use be confirmed with OB

Make the note text-dense and legible, with no extraneous protected identifiers beyond the specified fixture IDs
