Approved Exposure Model Inputs

Approved compliance modeling sheet containing the sanctioned inputs and formula notes required to compute regulator-notice exposure for the active matter only. Also lists active matter index entries and similarly named adjacent matters required to prevent scope creep.

Details

Matter Id	LC-008
Document Title	Approved Exposure Model Inputs
Company	Northlake Biologics
Approval Status	Approved for active matter use
Prepared By	Compliance Analytics
Approval Date	2024-04-02
Input 1	affected claims count 14
Input 2	average claim value 1850 USD
Formula Note	regulator notice exposure equals affected claims count times average claim value times escalation multiplier times control factor
Scope Note	applies only to active matter LC-008
Review Note	do not use adjacent matter assumptions

Model Version = En-4

Model Version	EN-4.2

Input 3 = Escalation Multiplier 1

Input 3	escalation multiplier 1.35

Input 4 = Books-And-Records Control Factor 0

Input 4	books-and-records control factor 0.8

Additional Information

a realistic 2-page compliance modeling input sheet PDF

a structured table of approved inputs with labels, values, units, and short comments

a separate section for formula notes and scope limitations, emphasizing active-matter-only use

prepared-by and approval signoff fields
