report footer or notation includes entity ID TRO-supporting	

Additional Information

a realistic 2-page internal security/audit log PDF in a corporate IT report style

Use a header with company/security team branding, a report title, generation timestamp area, and a small reference line containing entity ID LC-008

The main content be a structured table of timestamped events with columns such as time, system, user, event type, asset/repository, source/destination, status, and notes

varied event rows spanning the user’s final workday, with some normal authentication entries and some clearly notable data-access and transfer events

a second page with analyst notes or an alert summary panel, plus an evidence-handling/footer notation that includes entity ID TRO-supporting

Keep the layout realistic for a security export or compliance review packet
