Additional Information

a realistic 2-page PDF export from an incident-management or spreadsheet system

The first page contain a structured incident summary block followed by rows listing timestamp, timezone, event type, status, owner, and notes

one clearly labeled planned maintenance entry distinct from outage events

The second page continue the timeline and include a summary section with duration, root-cause note, communications log references, and a small footnote stating how planned maintenance is treated for SLA calculations

This report is confidential and intended for authorized recipients only.
