Network Resiliency Policy

Internal partnership procurement policy defining allowable resiliency pairings, budget cap, and installation restrictions handling.

Details

Document Title	'Regional Office Internet Resiliency Partnership Policy 2025'
Policy section states all recommendations for partnership requests must include two independent access paths or a documented exception	
Policy section states monthly recurring spend cap for request REQ-PART-31044 under customer CUS-6678 is $3600	
Policy section states one-time installation spend cap is $5000 total	
Policy section states rooftop-mounted radio, dish, or antenna installations are prohibited at leased sites unless explicit landlord roof permit is shown	
Policy section states if building materials prohibit exterior core drilling, vendors requiring a new exterior wall penetration are non-compliant	
Policy section states preferred demarcation point for this office class is basement telecom/MPOE where available	
Policy section states for partnership reviews the selected bundle must be routed through owner group 'Network Procurement Review'	
Policy appendix references review record family INC-NET-31044 for the active request	
Policy notes instruct creation of a follow-up incident for the next compliant implementation step after bundle selection	
Policy includes a nearby archived example referencing INC-NET-31014 as a distractor	

Additional Information

explicit, machine-readable policy clauses: (1) partnership requests require two independent access paths unless a documented exception exists; (2) for REQ-PART-31044 / customer CUS-6678 the MRC cap is $3,600 and total one-time install cap is $5,000; (3) rooftop-mounted radios, dishes, or antennas are prohibited at leased sites unless explicit landlord roof permit is shown; (4) if building materials or landlord restrictions prohibit exterior core drilling, any vendor requiring a new exterior wall penetration is non-compliant; (5) preferred demarcation is basement telecom/MPOE where available; (6) active partnership review be routed to owner group 'Network Procurement Review'; (7) after selecting a compliant bundle, create a follow-up incident for the next compliant implementation step

an appendix with an archived sample reference to INC-NET-31014 to introduce a nearby distractor, but make the active instructions clearly tied to INC-NET-31044
