Moderator Email Thread Takedown Followup

PDF rendering of the moderator/platform email thread documenting prior takedown attempts, response status, and the correct abuse-contact target.

Details

The email thread references request id RQ-64012
The email thread references customer id CUS-6671
The email thread references case id SI-023
The sender or recipient identity establishes the moderator or platform abuse desk contact for follow-up
The email text documents at least one prior takedown/removal request attempt
The moderator or platform response shows whether takedown failed, stalled, or was declined
The thread contains specific reasons given by the moderator/platform, if any, for not removing the post yet
The thread contains timestamps needed to verify the failed takedown timeline
The thread provides the exact target channel/address for the stakeholder follow-up required before final execution
The thread may mention another unrelated moderation conversation or case, creating a distractor that agents must distinguish from SI-023

Additional Information

The PDF include clear headers with From, To, Date, Subject, and message bodies

explicit references to case id SI-023, customer id CUS-6671, and request id RQ-64012 in the subject line or case metadata block

whether the prior request was unsuccessful, pending, or denied, with a brief rationale from the moderator/platform

timestamps that establish chronology and provide a concrete follow-up contact address or abuse desk destination that the stakeholder_response_coordinator would need to use

a brief unrelated mention of another case or moderator thread as a distractor, but keep SI-023 as the clear focal thread
